

Porsche expands all-electric SUV model lineup with the 2026 Cayenne S

Third derivative of the Cayenne Electric

Complementing the existing line-up of gasoline-powered and hybrid Cayenne models on sale today aimed at delivering a wide breadth of customer choice, the new Cayenne S enriches the all-electric offering within the SUV lineup, offering a balanced mix of high performance and efficiency. Its all-wheel drive system delivers 400 kW (536 hp) – and up to 490 kW (657 hp) with Launch Control. With model-specific front and rear design elements, the Cayenne S stands out with a distinctive appearance. In addition, Porsche is also presenting curated “Director's Cuts” from Style Porsche with the “Style” product line. The first of these is the Interior Style Package, which will be available for all versions of the Cayenne Electric.

- Electric all-wheel drive with a 400 kW (536 hp) power output, 490 kW (657 hp) with Launch Control
- Selected design elements in Volcano Grey Metallic on front and rear end
- Porsche Active Ride, PCCB, PTV Plus and Push-to-Pass optionally available
- New exclusive Interior Style Package for all Cayenne Electric models

Atlanta. Positioned between the Cayenne Electric and the top-of-the-range Cayenne Turbo Electric, the new 2026 Cayenne S Electric features an additional 165 kW (221 hp) of power compared to the standard model, sharpened exterior design, and even more extensive options previously reserved only for the top-model Turbo Electric. The Cayenne S Electric accelerates from 0 to 60 mph in 3.6 seconds when utilizing Launch Control and reaches a top track speed of up to 155 mph. Like the other two current

Cayenne Electric models, the S variant features a high-voltage battery with a gross

energy capacity of 113 kW, which at up to 400 kW² at a suitable fast-charging station, can be charged from 10 to 80% State of Charge (SoC) in less than 16 minutes³.

Direct oil cooling at the rear axle for high continuous load and efficiency

The drive system, which features permanent magnet synchronous motor on both front and rear axles, delivers a system output of 400 kW (536 hp), or up to 490 kW (657 hp) with Launch Control. Like the Cayenne Turbo Electric, the Cayenne S uses direct oil cooling for the rear-axle electric motor. Unlike with conventional electric motors, the heat is dissipated directly from the current-carrying components. The pulse inverter on the rear axle uses silicon carbide as a semiconductor material and processes currents of up to 620 amps.

The Cayenne S Electric is characterized by model-specific front and rear fascia pieces in Volcano Grey Metallic, while the inserts and diffuser are painted in the body color. The exterior styling is rounded off by 20-inch Cayenne S Aero wheels. Thirteen exterior colors and various interior and accent packages offer customers a wide range of possibilities for personalization.

Optional equipment includes Porsche Torque Vectoring Plus (PTV Plus) which provides even more precise driving dynamics. Optional Porsche Active Ride suspension almost completely compensates for body movements and aims to offer optimum comfort and handling. The high-performance Porsche Ceramic Composite Brake (PCCB) system with yellow-painted brake calipers is also available for the Cayenne S, as is the Sport Chrono Package. Included with the Sport Chrono package is the Push-to-Pass function, that when activated, delivers up to an additional 90 kW (120 hp)¹ of power for up to 10

seconds. The built-in Track mode optimizes performance on track through targeted pre-conditioning of the battery.

Like all Cayenne Electric models, the Cayenne S will come equipped with J3400 (NACS) DC-only fast charging port on the driver-side rear fender, and a J1772 AC-only charging port on the passenger-side rear fender. It will also come standard with a Porsche CCS DC Adapter.

The 2026 Cayenne S Electric – part of the electric Cayenne line-up that complements the existing gas and hybrid Cayenne models – is available to order now. MSRP starts at \$126,300, and does not include the delivery, processing and handling fee of \$2350. Total Manufacturers Suggested Retail Price (MSRP) shown excludes taxes, title, registration, other optional or regionally required equipment, and dealer charges. Deliveries are expected to begin at the end of Summer 2026.

New offering from Exclusive Manufaktur: the Interior Style Package

Under the “Style” product line, Porsche Exclusive Manufaktur is offering curated packages devised by the Style Porsche design studio and Exclusive Manufaktur. The first of these “Director's Cuts” is the Interior Style Package, which is now available as an option for all derivatives of the Cayenne Electric.

With a color and material scheme coordinated with the exterior color Mystic Green Metallic, the package creates a modern and exclusive ambience. At its heart is the two-tone leather upholstery in Black and Delgada Green, which extends to the door trims and the 14-way adjustable Comfort Seats, with the seat belts also picking up on the

color theme. Delgada Green decorative stitching emphasizes attention to de-tail inside the car, as does the embroidered outline of the Porsche crest on the headrests.

Aluminum decorative trims, painted in Izabal Green, provide modern contrasts against the upholstered leather surfaces. The GT sports steering wheel trimmed in black leather features a 12 o'clock marking and cross stitching in Delgada Green. An Izabal Green ring on the airbag module, and a knurled Drive Mode selection wheel in the same color, emphasize the distinctive styling. In the driver's direct field of vision, the dial of the compass, the Sports Chrono stopwatch and the power meter in the instrument cluster all incorporate the Izabal Green accents.

The features are complemented by an accent package in Silvershade, as well as an armrest in the center console embossed with "Porsche Exclusive Manufaktur" lettering. The vehicle key is also finished in Izabal Green and is presented in a case with decorative stitching in Delgada Green. The overall look is rounded off with black anodized aluminum door sill guards with the model designation illuminated in green, as well as black floor mats with decorative edging, emblems and stitching.

¹ Battery charge level and battery temperature may affect the Push-to-Pass performance.

² Cayenne charging power under specific conditions using NACS fast charging station supplying > 400 kW, > 850 V, > 520A, with an initial state of charge of 45 – 48%, battery temperature of 104°- 107° F. Maximum charging power for direct current (DC) when charging from 10% SoC to up to 80% SoC under optimal conditions: 390 kW (NACS fast charging station supplying > 390kW, > 850 V, > 520A, with a battery temperature of 60° F, initial state of charge 10% and remaining range < 37 miles).

³ Cayenne charging time for direct current (DC) with maximum charging power from 10% SoC to up to 80%SoC under optimal conditions (NACS fast charging station supplying >390kW, >850 V, >520A, with a battery temperature of 60° F, initial state of charge of 10% and remaining range < 37 miles).

About Porsche Cars North America, Inc. | One Porsche Drive, Atlanta, GA 30354 USA

Established in 1984, Porsche Cars North America, Inc. (PCNA) is the exclusive U.S. importer of the [Porsche 911](#), [718 Boxster](#), [718 Cayman](#), [Macan](#), [Cayenne](#), [Panamera](#) and [Taycan](#). **The [Porsche Car Configurator](#) can be used by anyone to customize and pre-order any vehicle in that lineup at any time.** Headquartered in Atlanta, Georgia, since 1998, PCNA is home to [the first Porsche Experience Center in North America](#), which features two module-based 1.6 mile driver development tracks, a business center and Restaurant 356. The campus is also home to the U.S. headquarters of [Porsche Classic](#). The company operates a second [Porsche Experience Center near Los Angeles](#). That complex features a driver development track with eight educational modules totaling 4.1 miles, a business center, Restaurant 917 and the headquarters of [Porsche Motorsport North America](#). PCNA supports 204 independently owned and operated Porsche Centers in the U.S., five Porsche studios and six satellite stores in the U.S., including supplying parts, service, marketing, and training. They, in turn, work to provide Porsche customers with a best-in-class experience that is in keeping with the Porsche brand's 75-year history of leadership in the advancement of vehicle performance, safety, and efficiency. PCNA is an indirect wholly owned subsidiary of Porsche AG, which is headquartered in Stuttgart, Germany.

At the core of this success is Porsche's proud racing heritage that boasts some 30,000-plus [motorsport](#) wins to date.
