911 GT3 RS (WLTP)*: Fuel consumption combined: 13.2 l/100 km; CO_2 emissions combined: 299

g/km; CO_2 class: G

The six-cylinder boxer engines of the current generation work powerfully and efficiently to deliver the highest performance. The basic engine in the Carrera, Carrera 4 and Carrera T is a 3.0-litre twin-turbo six-cylinder engine with 385 PS: the S versions deliver 450 PS, and 480 PS is provided by the GTS variants and the 911 Dakar. A 3.8-litre twin-turbo engine is used in the 911 Turbo (580 PS), the 911 Turbo S (650 PS) and the 911 Sport Classic (550 PS). The GT3 (510 PS) and GT3 RS (525 PS) super sports cars each have a naturally aspirated 4.0-litre six-cylinder boxer engine.
